

Senior Web Developer

Reports to: Sr. Director, Development & Research
FLSA: Exempt - Full Time
City/State: Remote, U.S. Based

Description: **GENERAL DESCRIPTION OF POSITION**

CGi is a forward-thinking company specializing in full-service association and event management. We are committed to innovation and excellence and are looking for a talented Senior Web Developer to join our dynamic team. If you have a passion for developing scalable web-based solutions and want to contribute to cutting-edge projects, we want to hear from you!

We are seeking an experienced and skilled Senior Web Developer to lead and contribute to the development of our SaaS-based services and system integrations. The ideal candidate will have a strong background in full stack development, with expertise in .NET, VB, HTML/CSS, JavaScript/jQuery, MS SQL, MySQL, and AWS. Experience with Salesforce, learning management systems (LMS), and custom code is a plus.

Requirements: ESSENTIAL DUTIES AND RESPONSIBILITIES

- Design, develop, and maintain scalable SaaS-based applications and services.
- Lead end-to-end development processes, including architecture, design, implementation, and testing.
- Collaborate with cross-functional teams to gather requirements, develop scopes of work and deliver high-quality software solutions.
- Develop and maintain front-end and back-end components using .NET, VB, HTML/CSS, and JavaScript/jQuery.
- Implement and manage database solutions with MS SQL and MySQL, ensuring optimal performance and security.
- Utilize AWS and DNS for cloud-based services, ensuring reliable and scalable deployment.
- Troubleshoot and resolve complex issues in a timely manner.
- Mentor and guide junior developers and/or contractors, providing technical leadership and best practices.
- Efficiently manage existing, new, or unplanned projects or programs with agility, flexibility, standardization, and monitoring.
- Stay up-to-date with emerging technologies and industry trends to continuously improve development practices.
- Work to continuously and strategically improve programs through a review of systems, product functionality, program enhancements, and process flows.

EDUCATION AND EXPERIENCE

- Bachelor's degree in computer science, engineering, or a related field from an accredited college or university, with minimum of 5 years of senior-level, professional experience in full stack web development; or

- Associate's degree in computer science, engineering or related field from an accredited college or university, with a minimum of 8 years of senior-level, professional experience in full stack web development.
- Demonstrated project and/or program management, creative problem-solving skills, and a history of achieving outcomes.

REQUIRED SKILLS & CRITICAL COMPETENCIES

- Proven experience in developing and deploying SAAS-based applications.
- Strong proficiency in full stack development with expertise in:
 - .NET (C#, VB)
 - HTML/CSS
 - JavaScript/jQuery
 - MS SQL / MySQL
 - AWS and DNS
 - Database architecture and design
- High Proficiency in Microsoft Office Suite.
- Excellent problem-solving skills and the ability to work independently and as part of a team.
- Strong communication skills with the ability to interact effectively with stakeholders.
- Superior attention to detail, organization, and follow through, including system documentation.
- Relentless focus on clients' needs and consistent raising of the bar on service excellence.
- Demonstration of a high level of integrity and ethics with superb judgment and maturity to manage sensitive information with care and confidentiality.
- Ability to thrive in a fast-paced, collaborative environment with a high comfort level in being accountable for decision making.

NICE TO HAVE SKILLS

- Experience with Salesforce development and integration.
- Familiarity with eLearning standards and learning management system (LMS) development.
- Experience with tenet deployment/management.
- Proficiency in WordPress development, including custom coding on the WordPress platform.
- Experience and proficiency with project management applications and practices.
- High comfort level with adoption of new technology, software, or applications.
